

Assurant Equity Extended

Editable Brochure Instructions

ASSURANT®

Drive Protection B2C Collateral

For B2C marketing of Drive Protection we are providing clients with two assets:

- T&C's form with fillable form fields for Administrator information
- InDesign art package for Drive Protection brochure that requires only logo placement and Administrator information added. The accompanying PDF is a visual example only.

T&C's

Editable PDF form fields should be easy to recognize by their blue coloring. Simply populate editable fields with appropriate information, then select File/Save As. In the dialog box, select "Restrict Editing", then title appropriately.

Brochure Art Package

This is a professional InDesign art package. The art requires a professional designer, in-house designer, agency, or print studio to place the client logo on the cover, and any necessary administrator information on the back cover.

The actual brochure content is layered to prevent editing of legally approved content. All necessary art components such as fonts and photography are included in the package. Design resource will need access to current version of Adobe InDesign.

The customizing process should take only minutes to minimize costs. If you experience any issues with the package, please contact:

joel.craig@assurant.com
